		PM		IS649	HRS	NORMHRS				
		night		IS649	HRS	NORMHRS				

**Summary of week:** HRS stops taking K beam on Sunday (3rd June) afternoon. GPS switches to In on Sunday and continues to IDS for fast-timing measurements of neutron rich In. Protons on convertor and lasers in narrowband mode. Tuesday intervention - coordinated with target change) for RILIS laser window on HRS. LIST electronics on Tuesday? Else Wednesday. Sector repumps overnight. Wednesday GPS finishes (possible short collection for calibration). HRS setup for Sc starts. COLLAPS take beam from Thursday evening

(GPS): #653 UC Ta n: Neutron rich In to IDS. Setup at 50kV Continuation from Cu run. Lasers in broadband mode. **Note protons on convertor only!!!!**  
**Responsible for target:** Joao Pedro and Ferran.

(HRS): #626 Ta - W for Sc beams to COLLAPS. HT = 50kV. RFQ in bunching mode.

**Responsible for the target #626:** David and Sebastian.

Protons: NORMGPS (conv) till Wednesday morning. NORMHRS from Thursday.

Operations responsible: Miguel (169616) until 5th June Emanuele (167813) afterwards.
