		PM		RFQ tests	GPS	NORMGPS										
		night	IS528	RFQ tests	GPS	NORMGPS										

Summary of week: IS614 finish with Mg to LA1 on Monday afternoon. Protons off at 1600 to allow for cooling for the CERN technical stop. This may affect controls from Tuesday - Wednesday afternoon (not yet known). On Tuesday REXtrap tests on GPS overnight and Wed night. IS528 prepares for Tb collections over the weekend. If possible beam may be sent to IDS depending on availability of central beamline. Collections start properly on Sunday with shipments to PSI starting on Monday 25/06 morning. HRS continues with machine development.

(GPS): #660 SiC LIST for Mg beams to LA1. Setup at 50-60kV. Isotope for the experiment: 22Mg. **Responsible for target:** Reinhard and TISD group. #655 Ta - W for Tb collections. Short Sc collections if possible. Priority to GLM/GHM collections, but IDS may take some shots if possible on neutron deficient Dy. Setup at 30kV. **No mass marker. Responsible for target: tbc**

(HRS): #661 VD5 target for RFQ tests. Tim, Stuart and Annie et al taking the beam.

Responsible for target: #661 Tim/Stuart/Annie

Protons: NORMGPS till Monday afternoon. NORMGPS from Friday.

Operations responsible: Alberto (167538) until 19th June. Simon (165711) afterwards.
