Monday	02/07/2018	AM		#562 UC Ta	HRS							
		PM										
		night										

**Summary of week:** On GPS Tb collections for IS528. Mostly at nights (149Tb) and afternoon/evening 155Tb/152Tb. Depending on production of Sc, 46Sc to GLM either Sat 23 June or mid-week. On Monday time for yields and IDS tests. On HRS MD work continues. Tuesday/Wed/Thursday long blocks of time required. Perhaps some chance for IDS to take beam at night (depending on Tb collections).

(GPS): #655 Ta - W for Tb collections. Short Sc collections if possible. Priority to GLM/GHM collections, but IDS may take some shots if possible on neutron deficient Dy. Setup at 30kV. **No mass marker. Responsible for target: Sebastian**

(HRS): #661 VD5 target for RFQ tests. Tim, Stuart and Annie et al taking the beam.

**Responsible for target: #661 Tim/Stuart/Annie**

Protons: NORMGPS till Friday morning.

Operations responsible: Simon (165711) until 26th June. Erwin (164585) afterwards.
