Summary of week: Start of winter physics. 7Be to XT03 from Friday. Careful setup without heating target (consult target group before any manipulations). 7Be to scattering chamber @ 5MeV/u from ~Friday onwards. Yields may well drop during the run.

(GPS): #635 UC - Ta for 7Be to the scattering chamber. Setup at 30kV. Mass Marker: Be. **DO NOT HEAT TARGET UNTIL ADVISED BY TARGET GROUP.**

(HRS): #672 CaO VD7 for 32Ar for WISArD. Setup at 30kV. Likely O contamination. Target may take quite a while to outgas. Cooler in transmission mode. Responsible for target: Sebastian/David.

#637 UC + CF4 leak. **DO NOT HEAT TARGET UNTIL ADVISED BY TARGET GROUP.**

Protons: after Monday morning: come back in 2021.

Operations responsible: Alberto (167538) until 13th November. Miguel (169616) till Tuesday 20th Nov.
