Summary of week: Winter physics week 3. RaF to CRIS till ~ Wednesday. Emittance measurements at LA1 from both GPS and HRS when available. Ti efficiency tests at GPS (FC490). Possible target for C beam to REX.

(GPS): #594 target for Ti efficiency tests.

(HRS): #637 UC + CF4 for RaF for CRIS. Setup at 40kV. Cooler in bunched mode. Responsible for target: Sebastian/David.  
 #637 UC + CF4 leak. **DO NOT HEAT TARGET UNTIL ADVISED BY TARGET GROUP.**

Protons: Coming back in 2021.

Operations responsible: Simon (167511) till Tuesday 27th Nov. Alberto (167538) afterwards.
