## **GPS**

SEM grid tests until Monday. Target change for #597: Monday (24) afternoon or Tuesday (25) morning.

No physics on GPS until end of week 16

## HRS

Responsible for the target: Yisel/Sebastian #596 CaO for IS601 (35Ar). IS632 will take some 17N for calibration of neutron detector. IS601 will take the beam to the VITO beamline. HV = as high as possible. RFQ: Bunching mode IS632 will take beam to IDS.

Protons: SEM grid tests on HRS then GPS. Physics starts Monday 24th. Proton scan and yield measurements possible when GPS SEM tests finished.

Responsible: Lefteris (166707) till Tue (25/04) AM.
