GPS

#513 (unless #606 is found to behave better before end of Tuesday 23/05). Carbon nanotube target for 8B beams. Responsible: Jochen

Runs until Monday morning ~ 0900-1000. Then REX tests with Fredrik and Johanna.

HRS

#600 UC - Ta for COLLAPS run in week 22.

IS617: AI COLLAPS run. Cooler in bunching mode. 50kV (tbc) confirmed.

Responsible for the target: Sebastian (tbc).

Technical stop on Wednesday. No protons until Thursday morning. COLLAPS take stable beams before.

Protons: NORMGPS Monday; Tuesday; NORMHRS once technical stop is over.

Responsible: Erwin (164585) till Tuesday 30/05 (AM). Emanuele (167813) until Tuesday (06/06) AM.
