#603 UC - Ta for IS608: Bi beams to windmill/IDS/RILIS (in-source). GLM opportunity for short collection of 204Bi for IS612 (to be discussed when best for IS608) Responsible: Joao Pedro.

Setup at 50kV (if possible), else highest possible voltage which holds. Protons on target. Proton scan with 26Na. Stable setup with 39K/238U or stable Bi if RILIS ready.

#602 UC W. K massmarker: stable setup on 39K. Responsible Sebastian.
RFQ in bunching mode. HT = 40kV
Isotopes of interest: 51 - 53K, but also 47, 49K
Protons on target. 26Na for scan.

Protons: NORMHRS Monday AM; Tuesday onwards: NORMGPS

Responsible: Emanuele (167813) till Tuesday 20/06 (AM). Miguel (169616) until Tuesday (27/06) AM.
