Summary of week: IS619: 15C to XT03 continues until 4 Sept. HRSL: Target change on Tuesday to test backup target #587. Second target change on Friday if production unit ready.

(GPS): # 613 CaO VD7. Setup at 30kV. 15C (molecular) to XT03.

NORMGPS.

Responsible for target: Joao Pedro. Please contact him before any heating of target takes place. Target temperature limit: 1000C.

(HRS): Backup test (pumping/heating) #587. Production target on Friday #588

Protons: NORMGPS all week.

Responsible: Miguel (169616) until Tuesday (29/08) AM. Emanuele (167813) till Tuesday 05/09 (AM).
