

Minutes of the ISOLDE Physics Group Meeting, 6th of Feb 2019

Technical news

- **General**
 - Preparing a quote for installation of new air conditioning in 508
 - Detector lab
 - CRIS Laser/DAQ room
 - Furnace room (chem)
 - Repairs have been done for the leaks in the ISOLDE control room to the floor and wall, but not to the roof (wrong order?!)
 - GPS and HRS frontends being replaced. Removal will take many months. New frontends will be installed march 2020 latest
 - Works to ISS went very well
 - Preparations ongoing for removal of non-working cryomodule that goes for repair – REMOVE ALL THINGS FROM ISOLDE SAS within the next 2 weeks!
 - Next Monday: removal of chiller from R199 (Crane access). Do not park cars in the ISOLDE parking lot and in front of b508
- **REX/HIE-ISOLDE**
 - Cathode of EBIS has been removed. Collapsed during procedure which shows it was due! New one will be installed by early 2020

Safety

- Karl is new TSO and Mark is new Deputy TSO of ISOLDE

Visits

- Next week: NPAC visit.
- March will be a very busy month
- Hanne will start keeping sheets of who guided tours at ISOLDE

AOB

- End of the week, there will be a deadline for the Summer student projects
- Meeting tomorrow to distribute ISOLDE-related tasks

Seminar

- The PGM was followed by a seminar of Heinz Hass (Univ of Aveiro and EP Division) with the title:
“PAC measurements on free molecules: experiment report”.
