

Minutes of the ISOLDE Physics Group Meeting, 27th of March 2019

Technical news

- **General**
 - GPS frontend removed this week. Recabling on schedule
 - MEDICIS starting up slowly for stable beam with issues related to quad electrodes and ventilation system
 - Cryomodule removal complete
 - REX-part of HIE ISOLDE RF upgrades planned
 - Electrical shut down next week (4th of April planned)
 - ISOLDE HALL and b508 affected
 - Emergency tests included
 - Maintenance of lights in ISOLDE hall planned
 - Review of telephones in ISOLDE and b275 ungoing to prepare for an upcoming upgrade to IP phones as standard. Offices will follow later

Safety

- Inspection in b275 went OK. Remark: "Too full of stuff "

Visits

- ! This Saturday, a visit is scheduled. Guides appointed. Will be the last time this goes on like in the weekends
- Coffee and Cookies will be supplied for ISOLDE guides. ONLY to be taken right before/after a visit as a thank you (no continuously raiding of the cupboard)

AOB

- Publications should be made available as OPEN ACCESS.
 - Preprint should be uploaded (can use ISOLDE CDS for this: EP repository > Section ISOLDE (see upcoming newsletter))
- No Helium will be available for the next 10 weeks! Prepare for this lack of delivery.
- ISOLTRAP will move offices
- New projector has been installed in this ISOLDE visitor's room
- POLAND@CERN coming up. Magda will send an email with available companies you can subscribe to meet with.

Seminar

- The PGM was followed by a seminar of Chris Ricketts (Univ of Manchester) with the title: "Neutron-deficient indium at CRIS".
