

Minutes of the ISOLDE Physics Group Meeting, 10th of April 2019

Technical news

- **General**
 - GPS frontend has been removed. The remaining cables will be removed next week
 - CA0: New tapestation has been installed (and removed from LA2). Not tested yet
 - Next INTC meeting is planned for beginning of July.
 - Status reports need to be ready 6 weeks before meeting
 - Some reports will be oral, some will be written
 - Feb 2020: INTC meeting dedicated to Solid State and Biophysics
 - CERN opendays Sep 2019. Delay with volunteer request from CERN side. Next week a preparation meeting will be held with the people involved.
 - All ISOLDE groups have found a summer student.
- **GPS**
 - GLM: new collection station will be installed and tested in the coming weeks
- **MEDICIS**
 - Hot cell leak test performed and passed (for target dismantling)

Visits

- Next week visit of KUL alumni
- A calmer period is coming for the visits.

Seminar

- The PGM was followed by a seminar of Agi Koszorus with the title: "Ground-state properties of 52K from collinear resonance ionization spectroscopy: Probing the N=32 subshell closure".
