

## Minutes of the ISOLDE Physics Group Meeting, 17<sup>th</sup> of April 2019

### Technical news

- **General**
  - Last removal of HRS/GPS frontends finished this week on time  
Dose rates much lower than expected!
  - Emergency tests for Elec in 508 have been performed
- **GPS**
  - Funds secured for EP for development of GHM GLM area to Class C type area of radioactivity
- **MEDICIS**
  - Starting up of MELISA (RILIS for MEDICIS). Hopefully this will soon be ready for Tb beam production

### Safety

- The plan of making Karl able to give the ISOLDE safety training does not seem as easy as expected. Will follow up on how this evolves.
- Medical follow-up of CAT B radiation workers will change slightly. See the email and CERN bulletin for more detailed information

### AOB

- All summer students have been allocated
- CERN Open days: invitation will be sent for a discussion meeting to the people involved

### Seminar

- The PGM was followed by a seminar of Simon Lechner with the title: "A cryogenic paul trap for MIRACLS' 30-keV MR-ToF".
