LS3 activities in ISOLDE hall

Version 12.03.2026

Week	Month	Date	RILIS	Machine	ISOLTRAP	Experiments					
2	Jan	5	Phase 1: Dismantling	Scaffolding GLM + dust protection over beamlines	EPC Platform construction						
3		12									
4		19									
5		26									
6	Feb	2									
7		9									
8		16				Installation of racks					
9	23										
10	Mar	2				Racks population, cabling etc.	Emergency exit drilling	Puma installation			
11		9							EN-CV eq. from roof	ISS Fill	
12		16									
13		23							Laser tables handling		ISOLTRAP LHe
14	Apr	30				EN-ACE - ISCOOL cage					
15		6									
16		13					CM1 dismounting & transport to SM18 (23/4)				
17	20					ISOLTRAP LHe					
18	27	EN-ACE - light structure removal			CRIS meas. campaign						
19	May	4									
20		11									
21		18				TAS	ISOLTRAP LHe				
22	25										
23	June	1	Scaffolding underneath structure for protection of machine/beam lines	BI - Diagnostic box meas. - block ~20 m2 in HIE-ISOLDE area (not cont.)	Platform (de)construction (second floor)	VITO RF beamline construction and commissioning					
24		8					SCE - metal platform removal		ISOLTRAP LHe		
25		15									
26		22									
27	29										
28	July	6									
29		13									
30		20									
31	27					ISOLTRAP LHe					
32	Aug	3			Platform (de)construction (first floor)	COLLAPS ion source - construction - commissioning (at least 4 weeks)					
33		10									
34		17									
35		24									
36	31					WISArD measurements	ISOLTRAP LHe				
37	Sep	7	Phase 2: Civil engineering and construction	Scaffolding underneath structure for protection of machine/beam lines	BI - Diagnostic box meas. - block ~20 m2 in HIE-ISOLDE area (not cont.)	VITO RF beamline construction and commissioning
